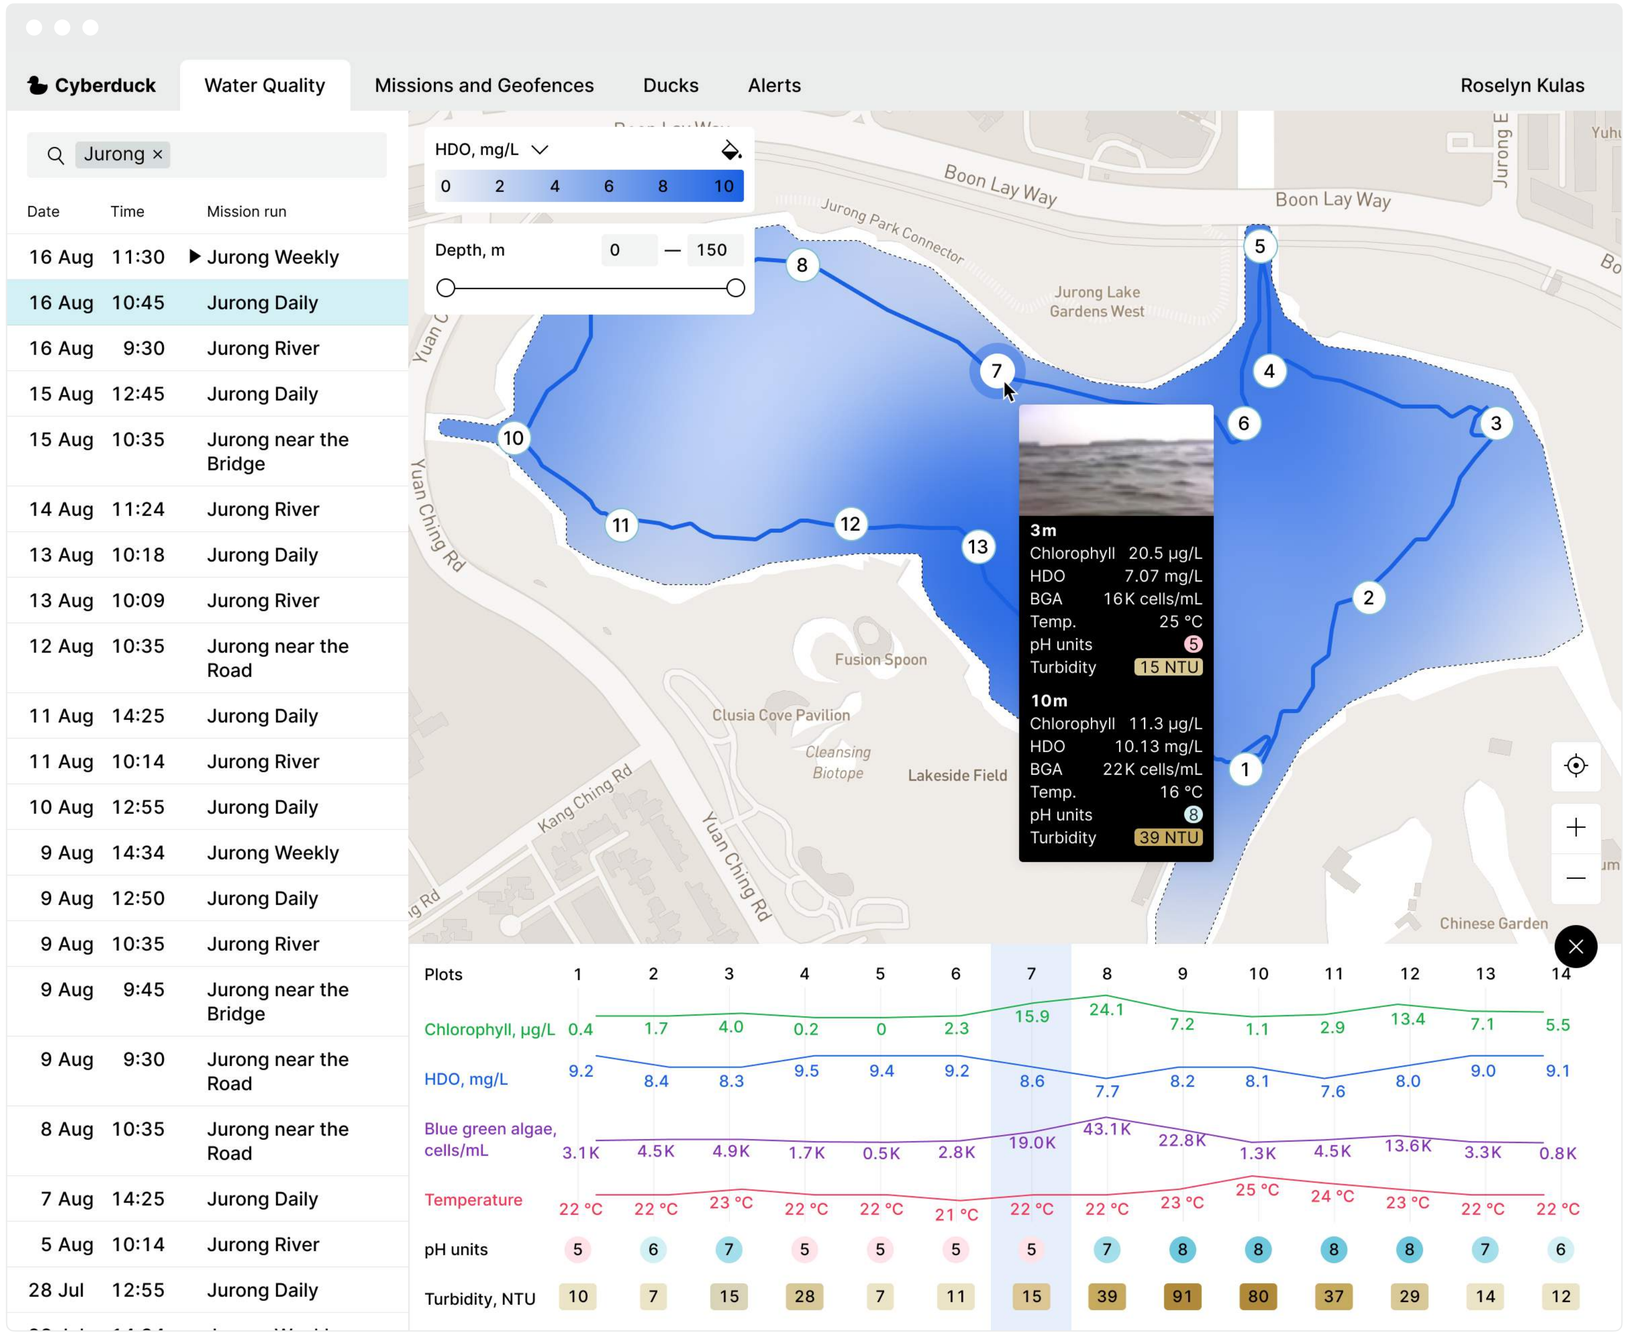
Interface of the urban pond monitoring system

Cyberducks are robots for collecting and analyzing water samples. They are used to monitor the cleanliness of rivers and lakes in cities.

We designed a Cyberducks management system. Operators create routes, set up tasks and analyze data sent by robots.

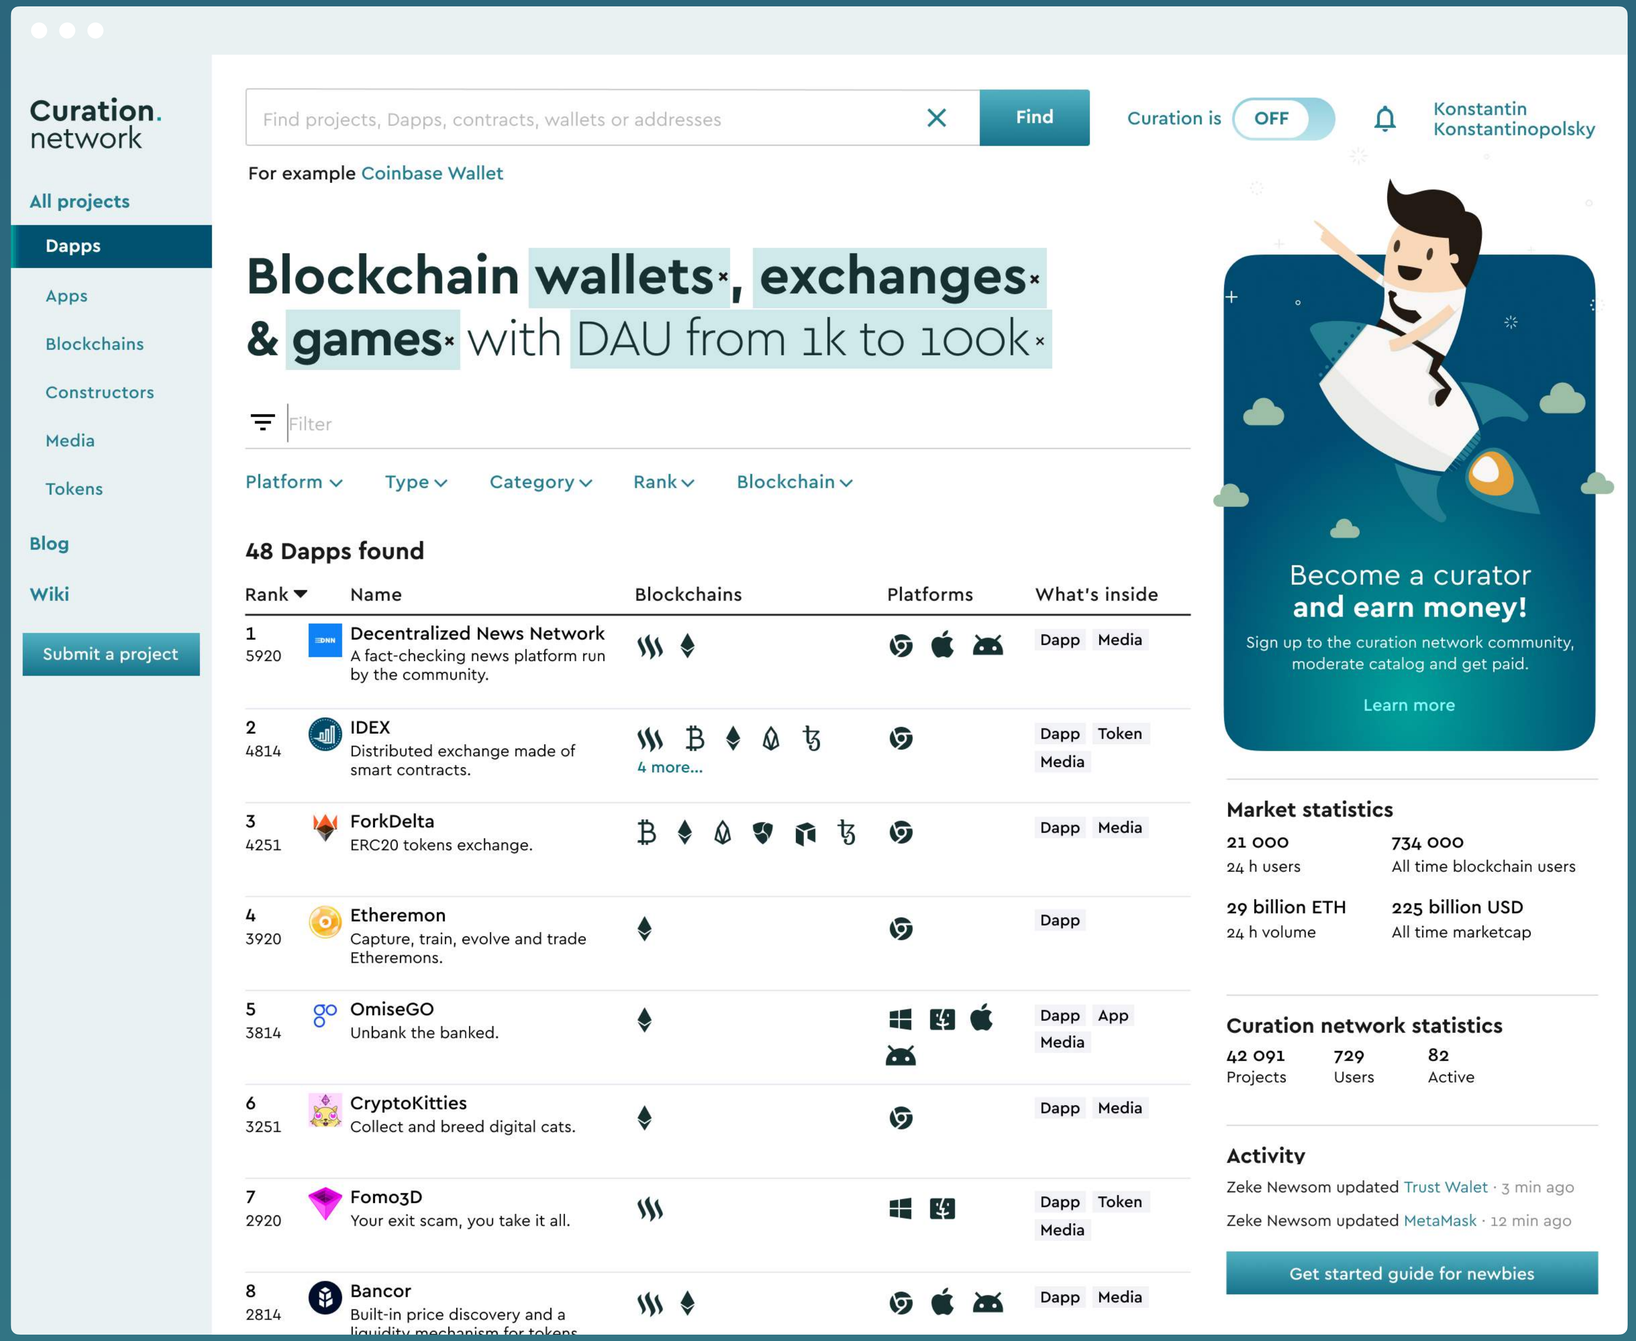


More in portfolio

Web-3 application showcase Curated Network

Curated Network is a platform for rating products based on blockchain technology, without a single owner and without censorship. This rating is honest and incorruptible.

We designed the platform interface in viewing and voting modes.

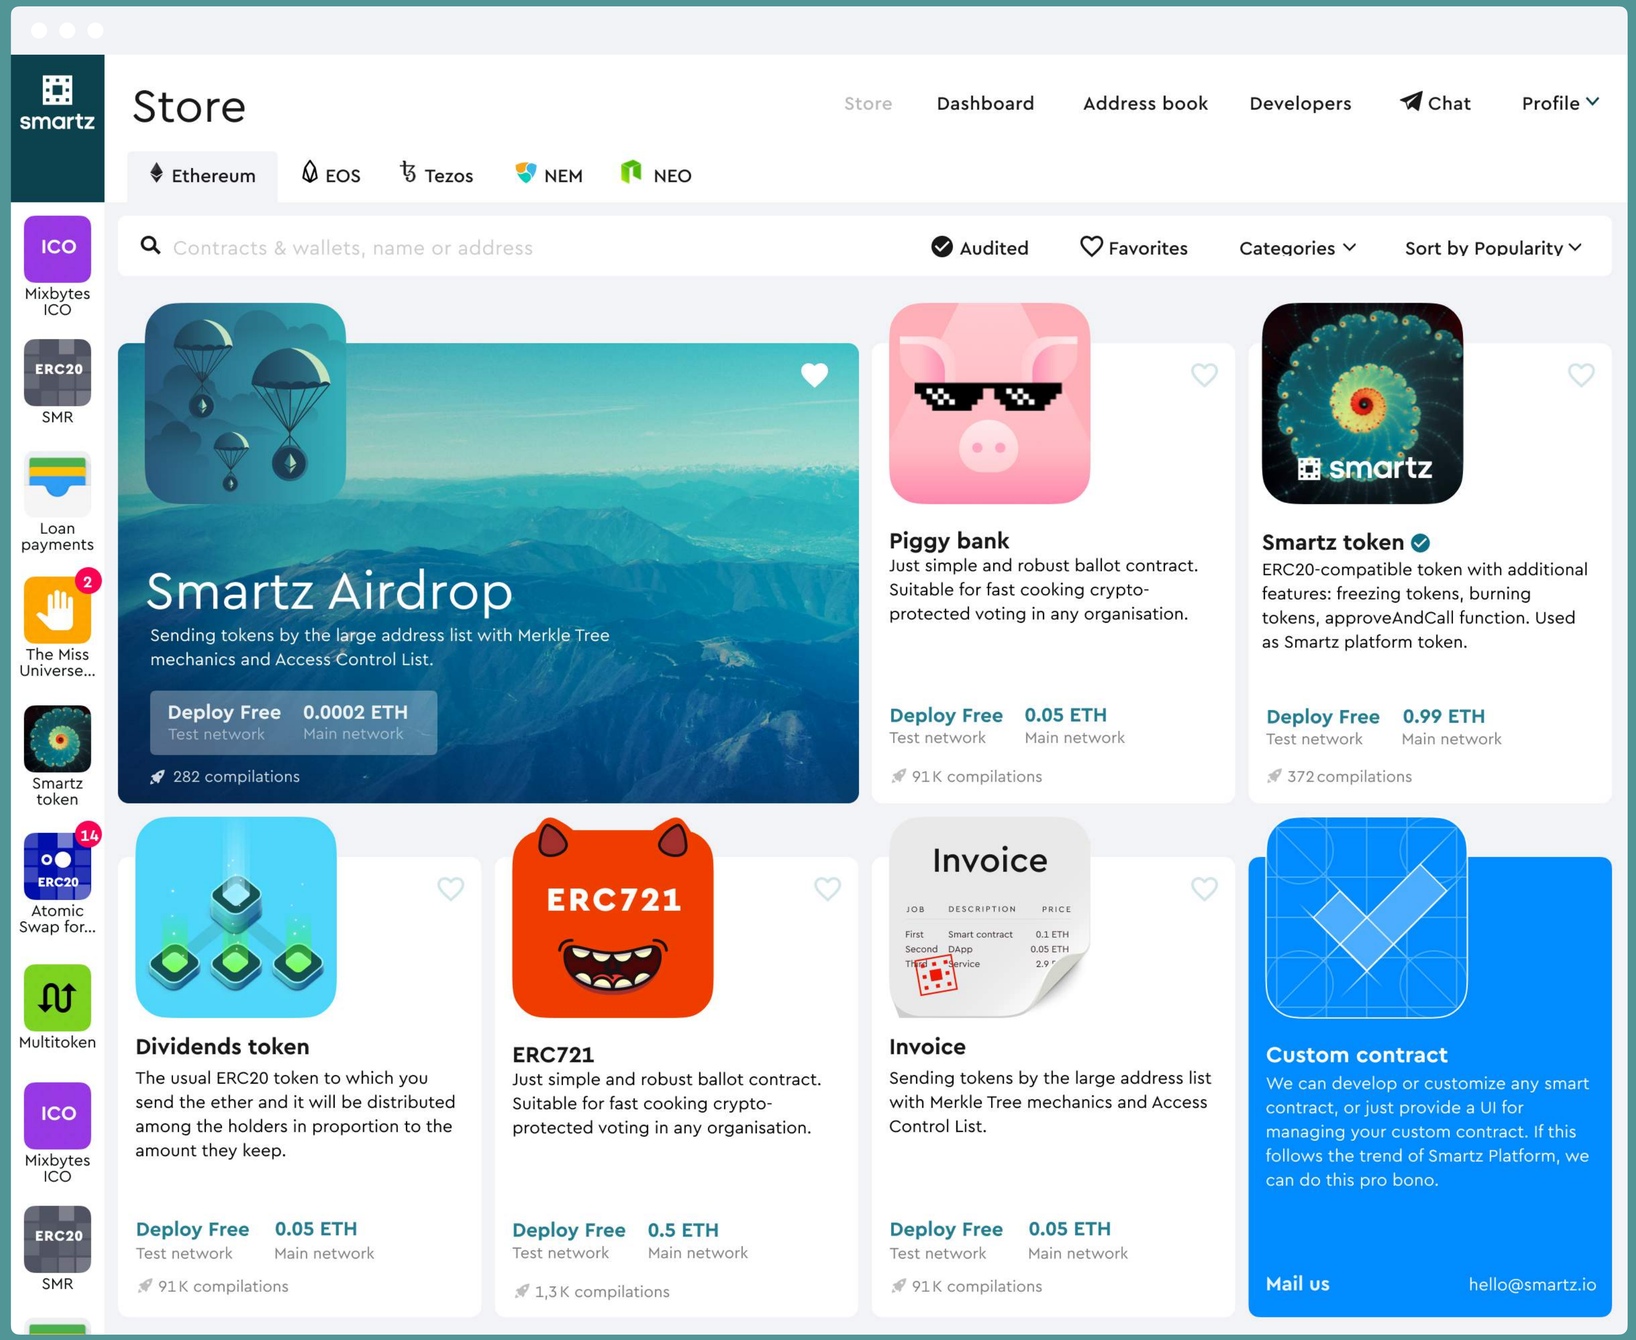


More in portfolio

Marketplace of smart contracts Smartz

Smartz is a store for secure contracts on the blockchain. People buy contracts to record agreements, issue invoices, or even rent an apartment.

We designed the marketplace interface, a dashboard for managing contracts, and a dashboard for developers.

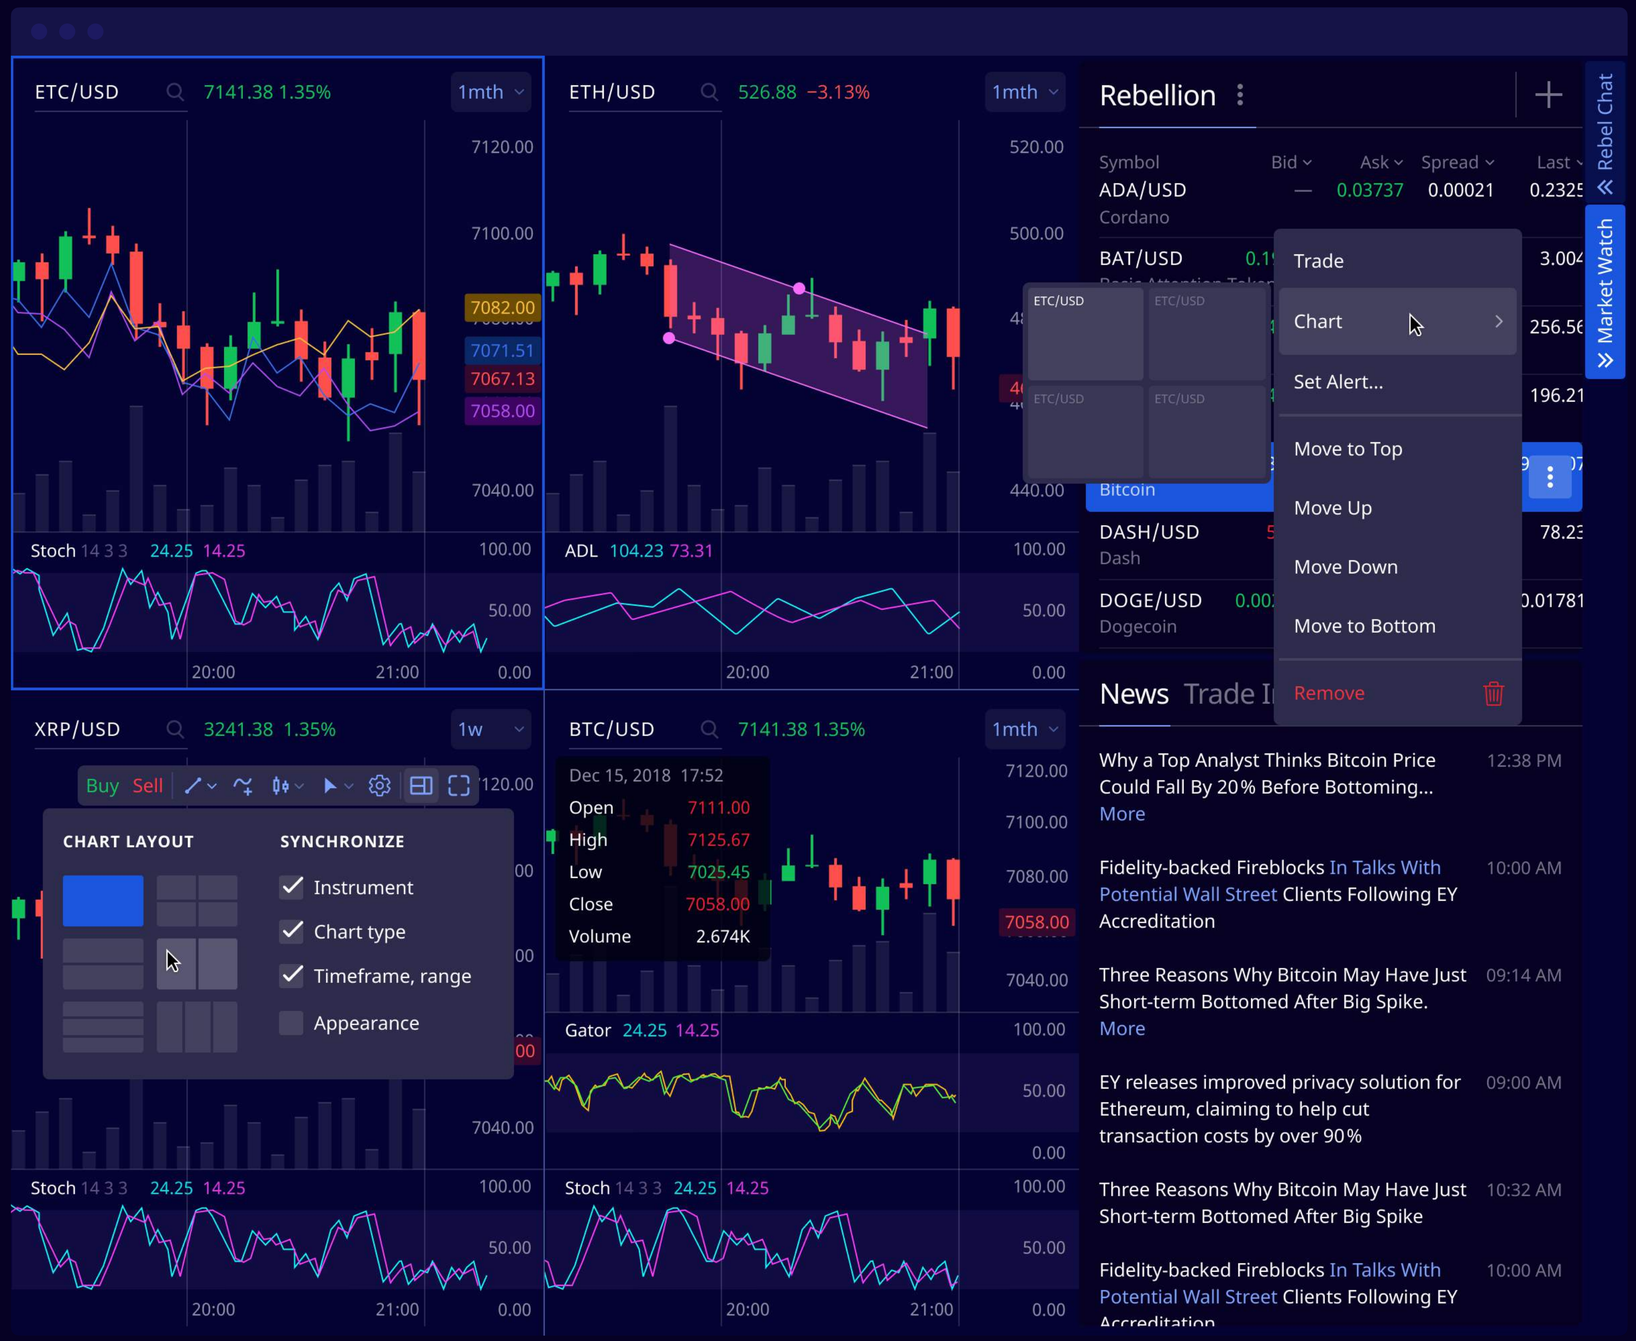


More in portfolio

Trading platform for the crypto community

This is a trading platform for cryptocurrencies. It is developing not as a private broker, but as a community. Traders get access to a chat with admin tips, news and analytics—features of the platform.

We designed the platform, chat and news widgets, and internal tools.

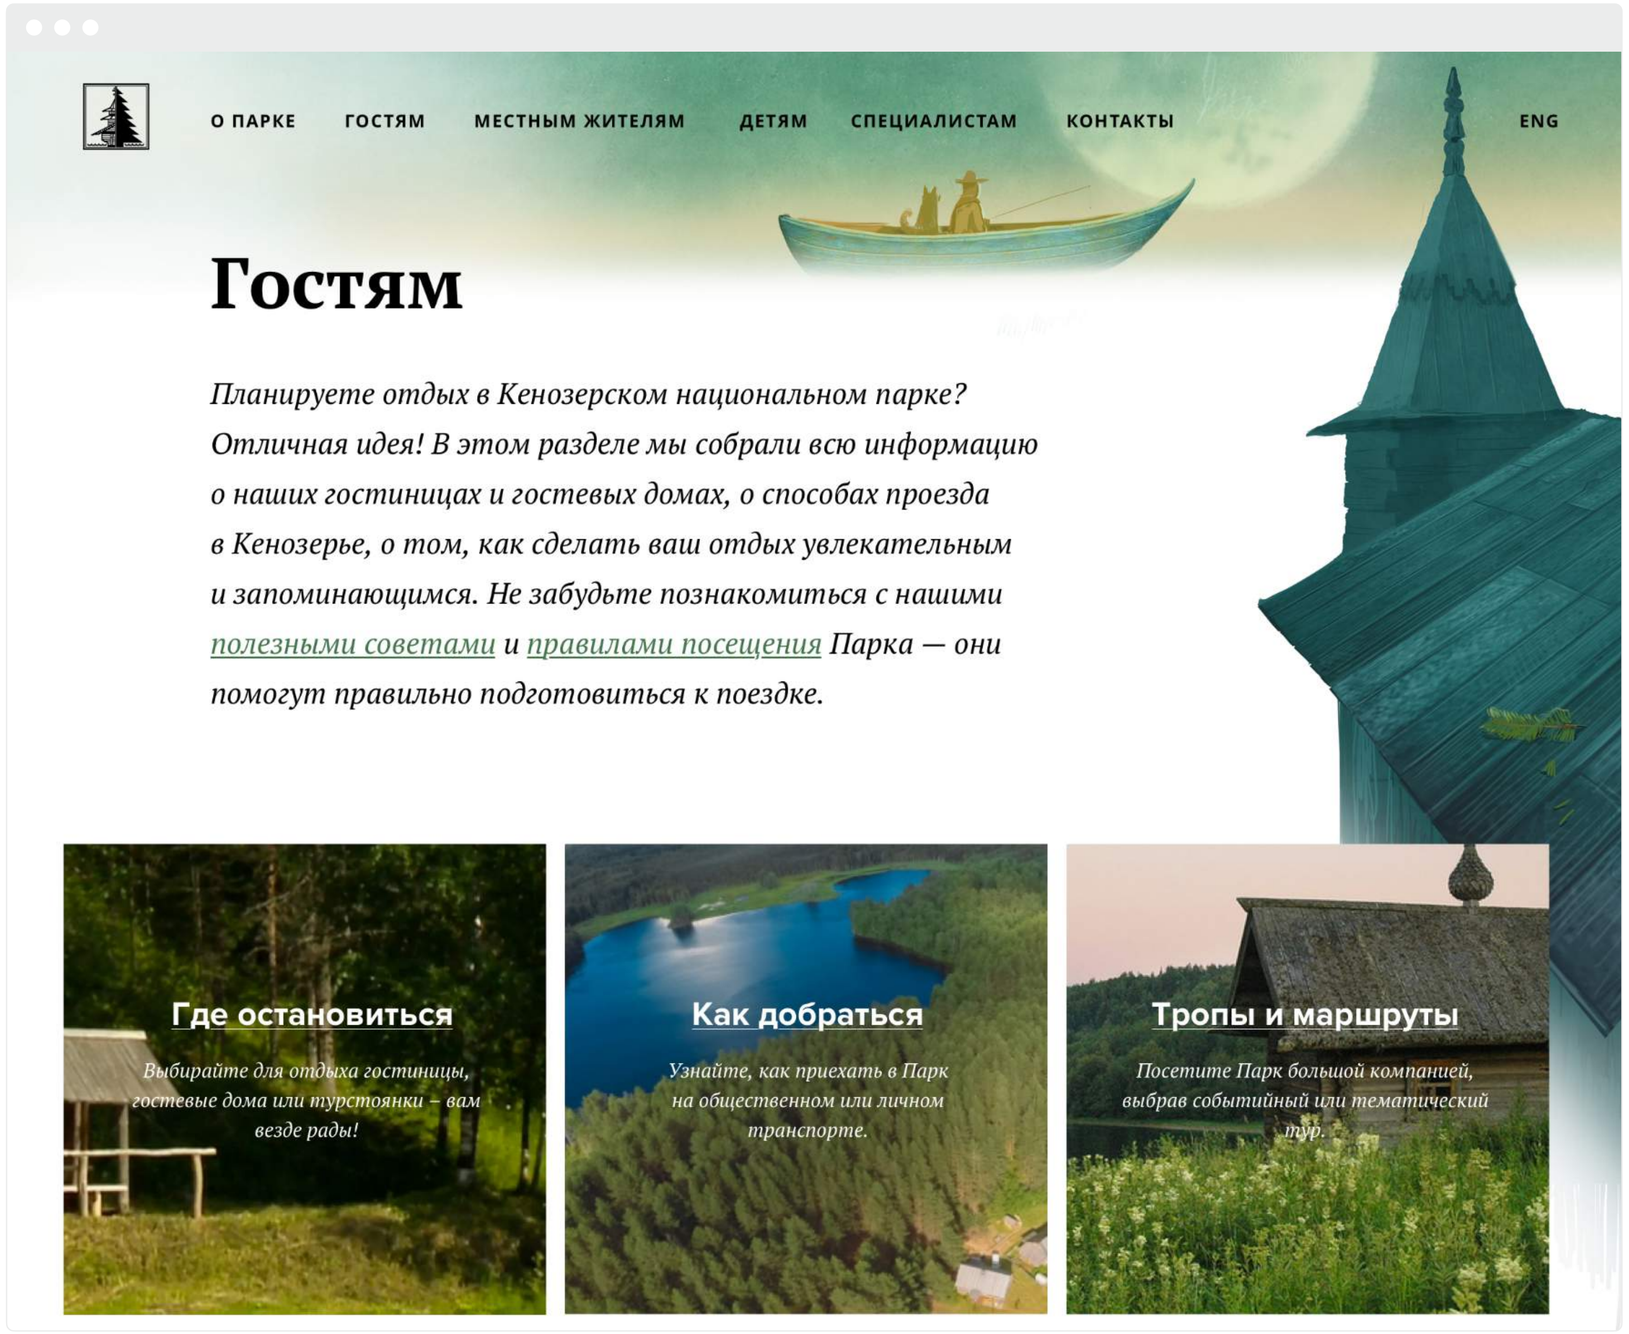


NDA

Kenozersky national park website

In Kenozero, people relax, go boating, sit under the night sky in tents and go hiking.

We designed the website and drew many beautiful illustrations.

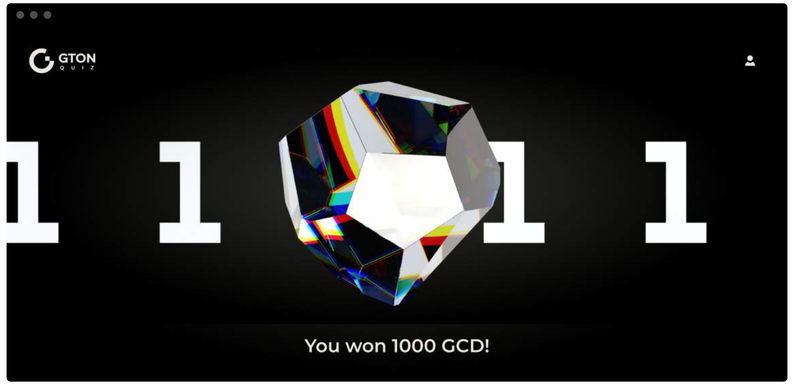


More in portfolio

Gton quiz platform

Quiz is a game in which participants answer questions and compete with each other.

We have developed a quiz interface and a question editor.

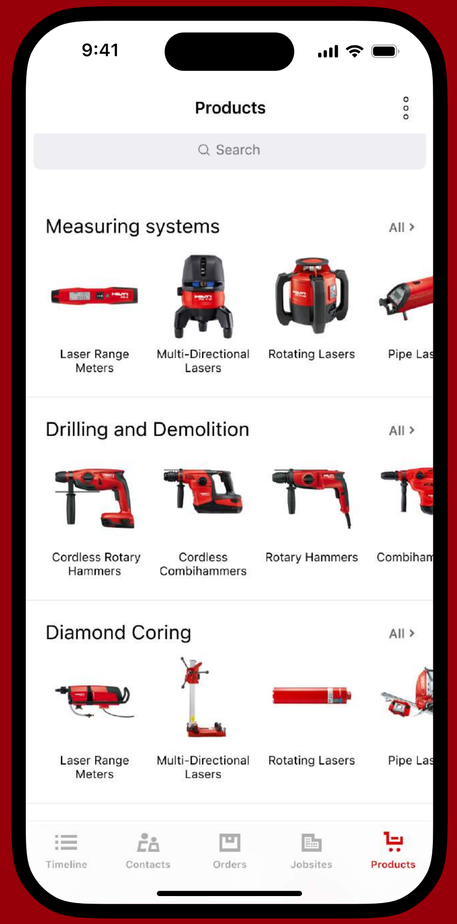


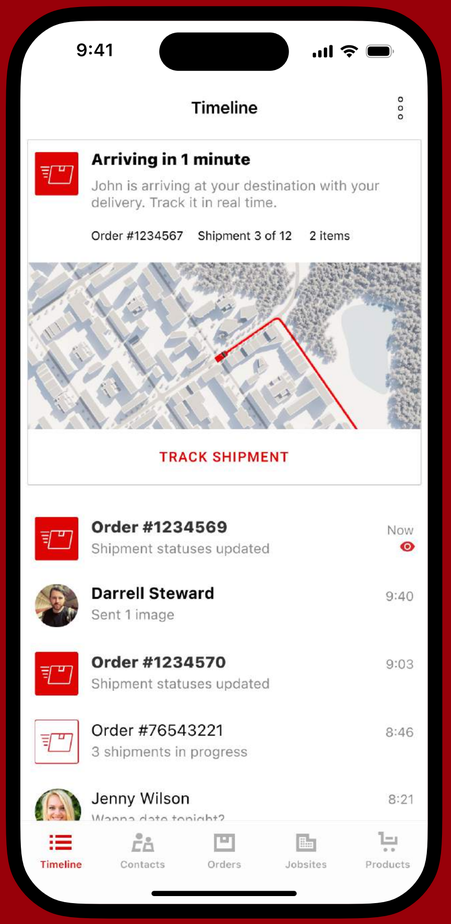
Preparing for publication

Application for superintendents of an international company

In the application, the foreman orders tools and consumables, monitors construction sites and resolves issues that arise.

We have designed an application for iPhone and Android.



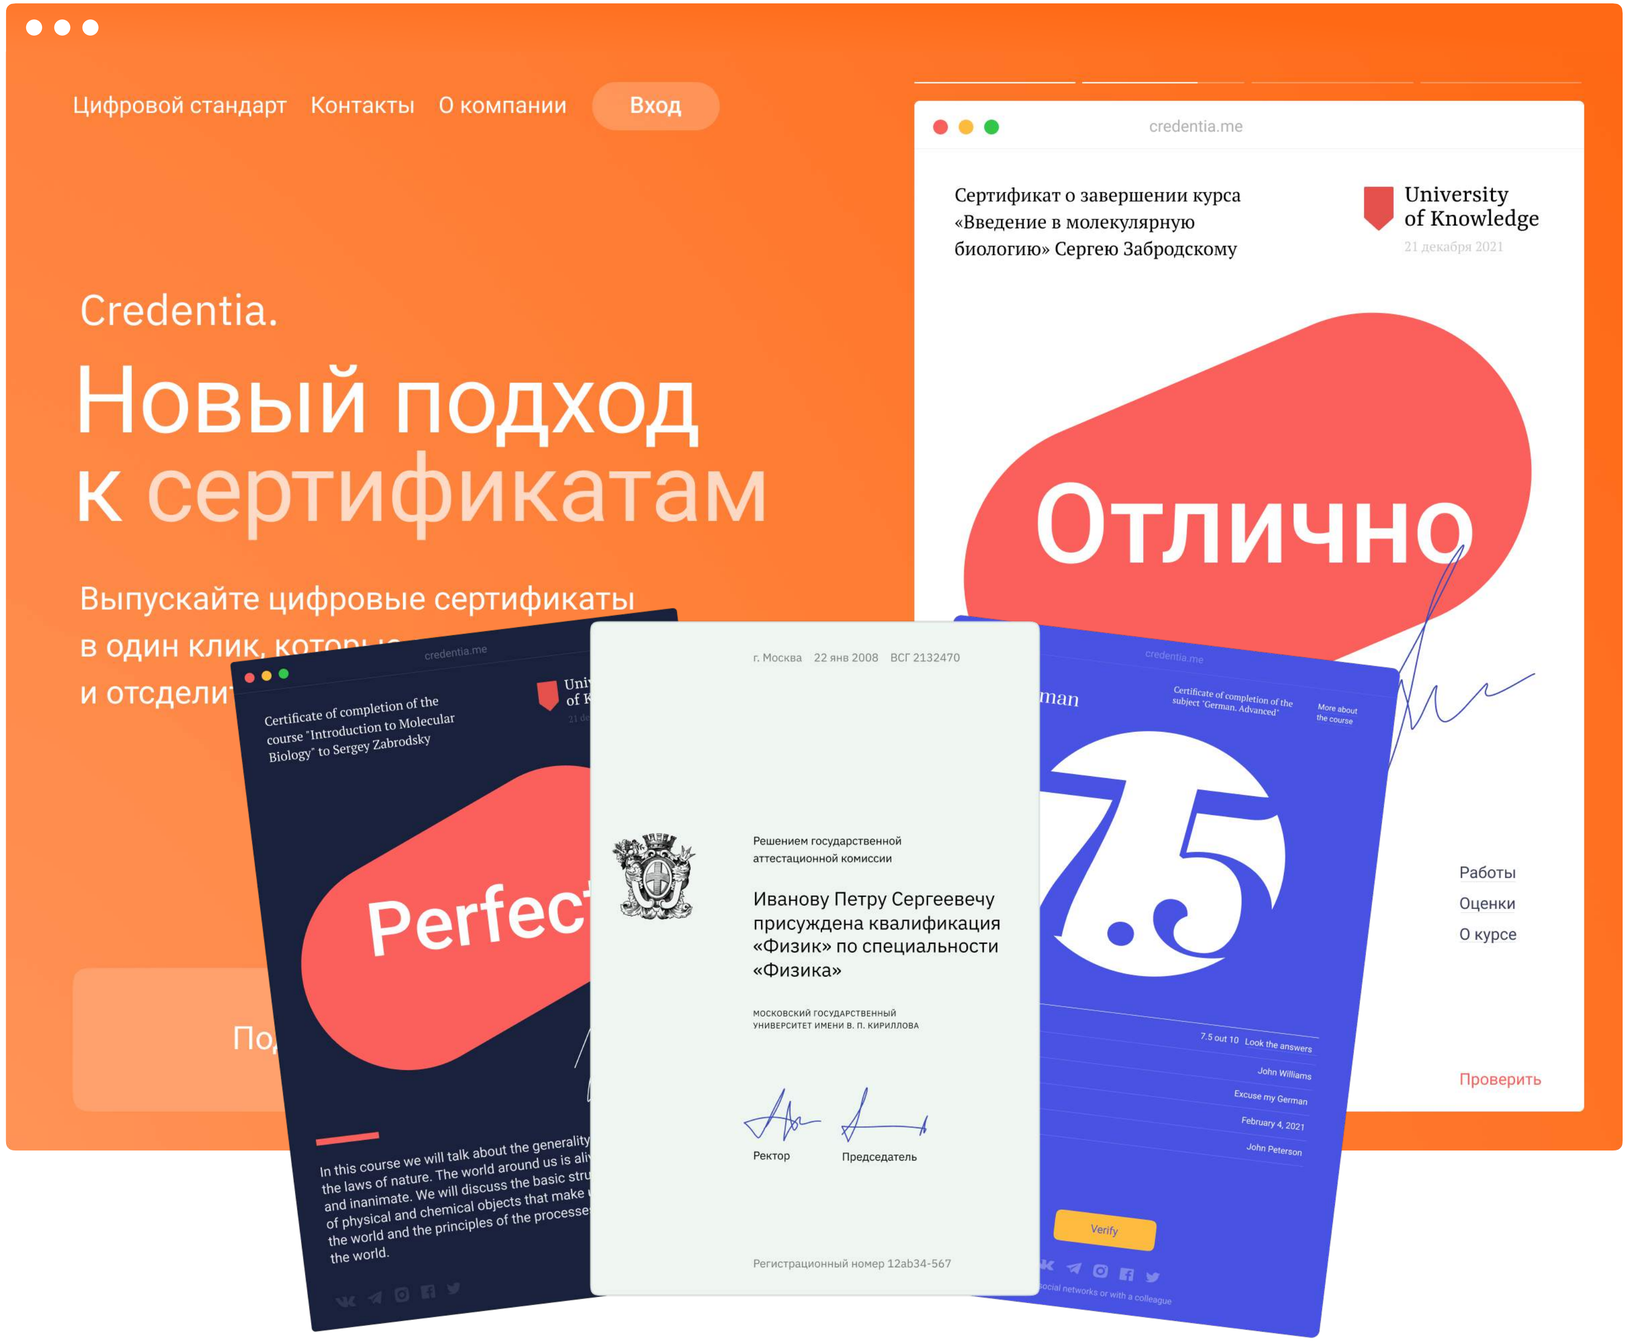


Preparing for publication

Credentia digital certificates

Credentia develops technologies for issuing and distributing electronic documents.

We designed the application, product page and digital certificates.

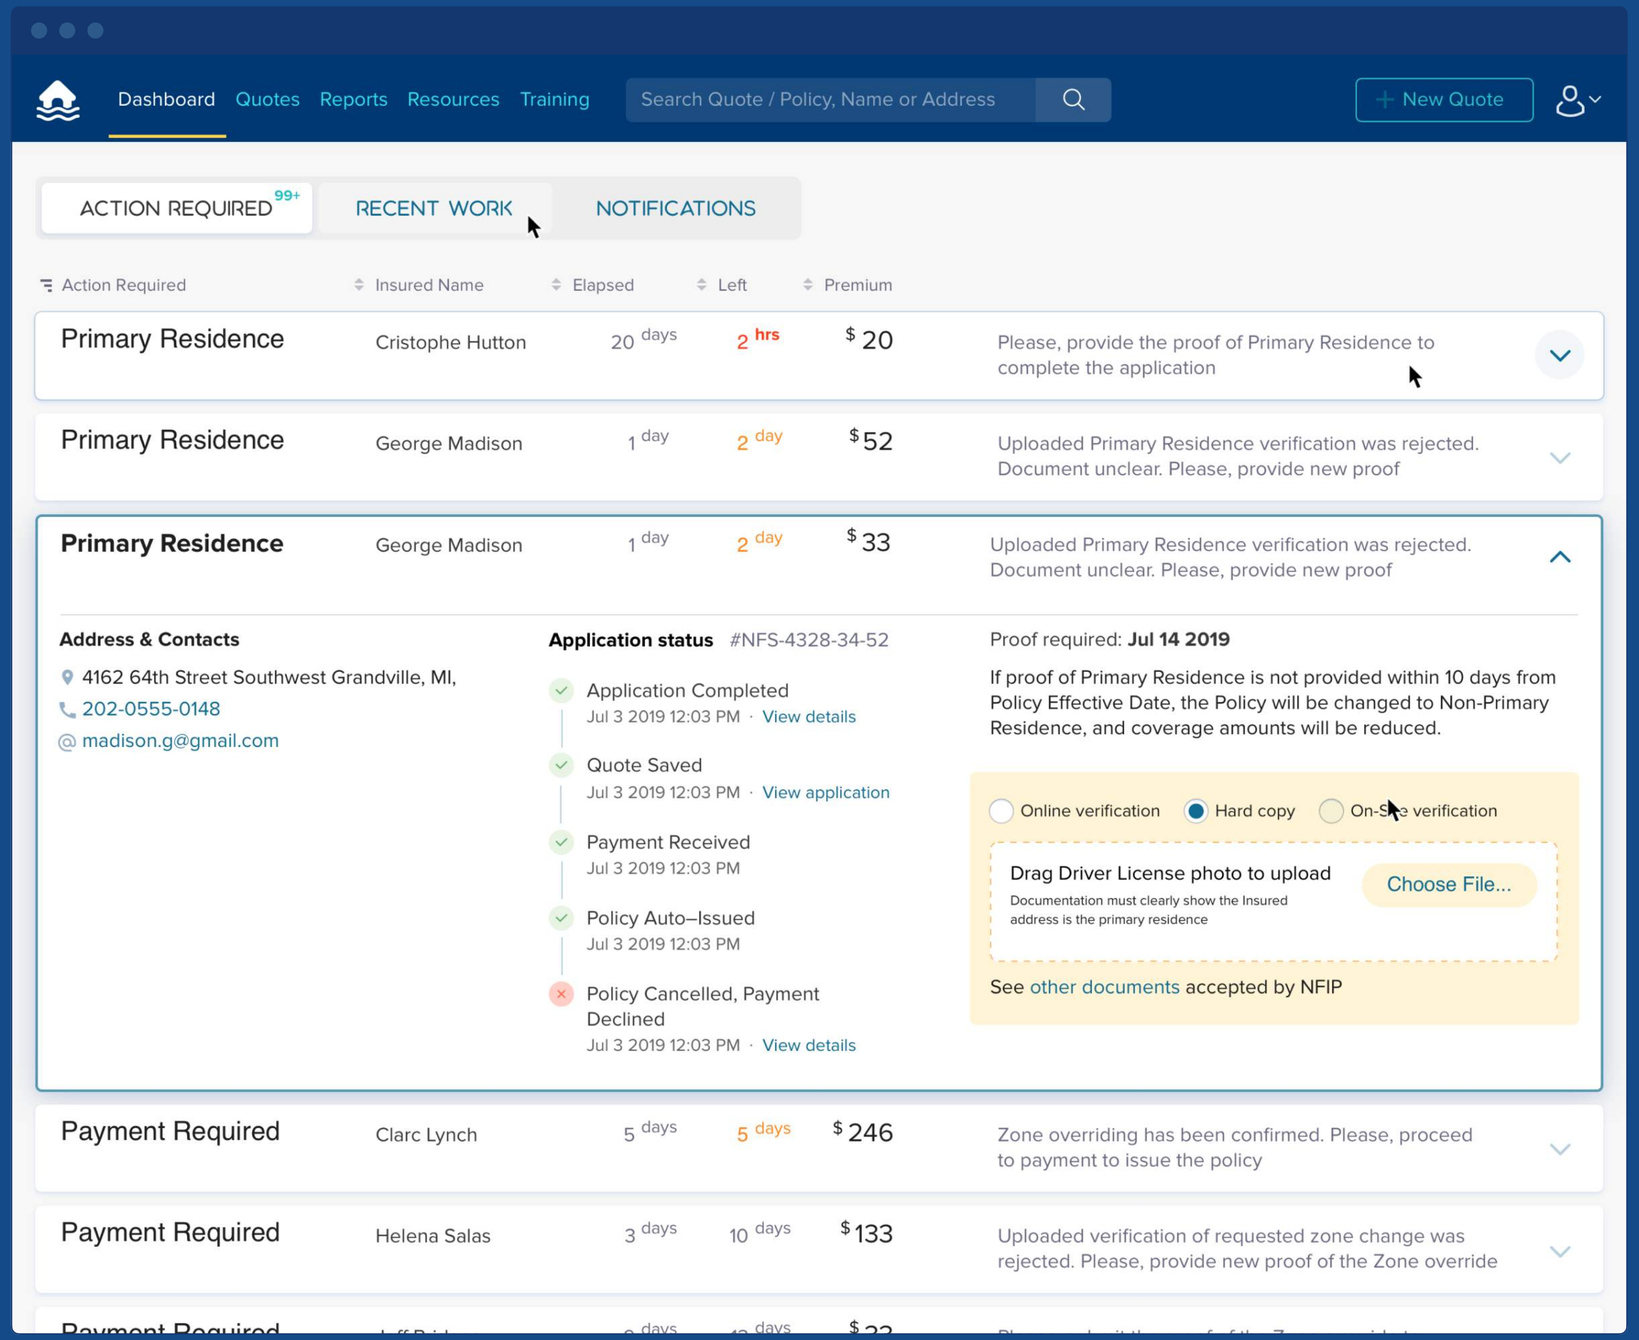


More in portfolio

Interface of Flood Insurance Services in the USA

Insurance agents assist clients in insuring their homes and avoiding unnecessary expenses. It's crucial to consider hundreds of parameters in the process.

To help agents do everything right, we've designed a personal account.

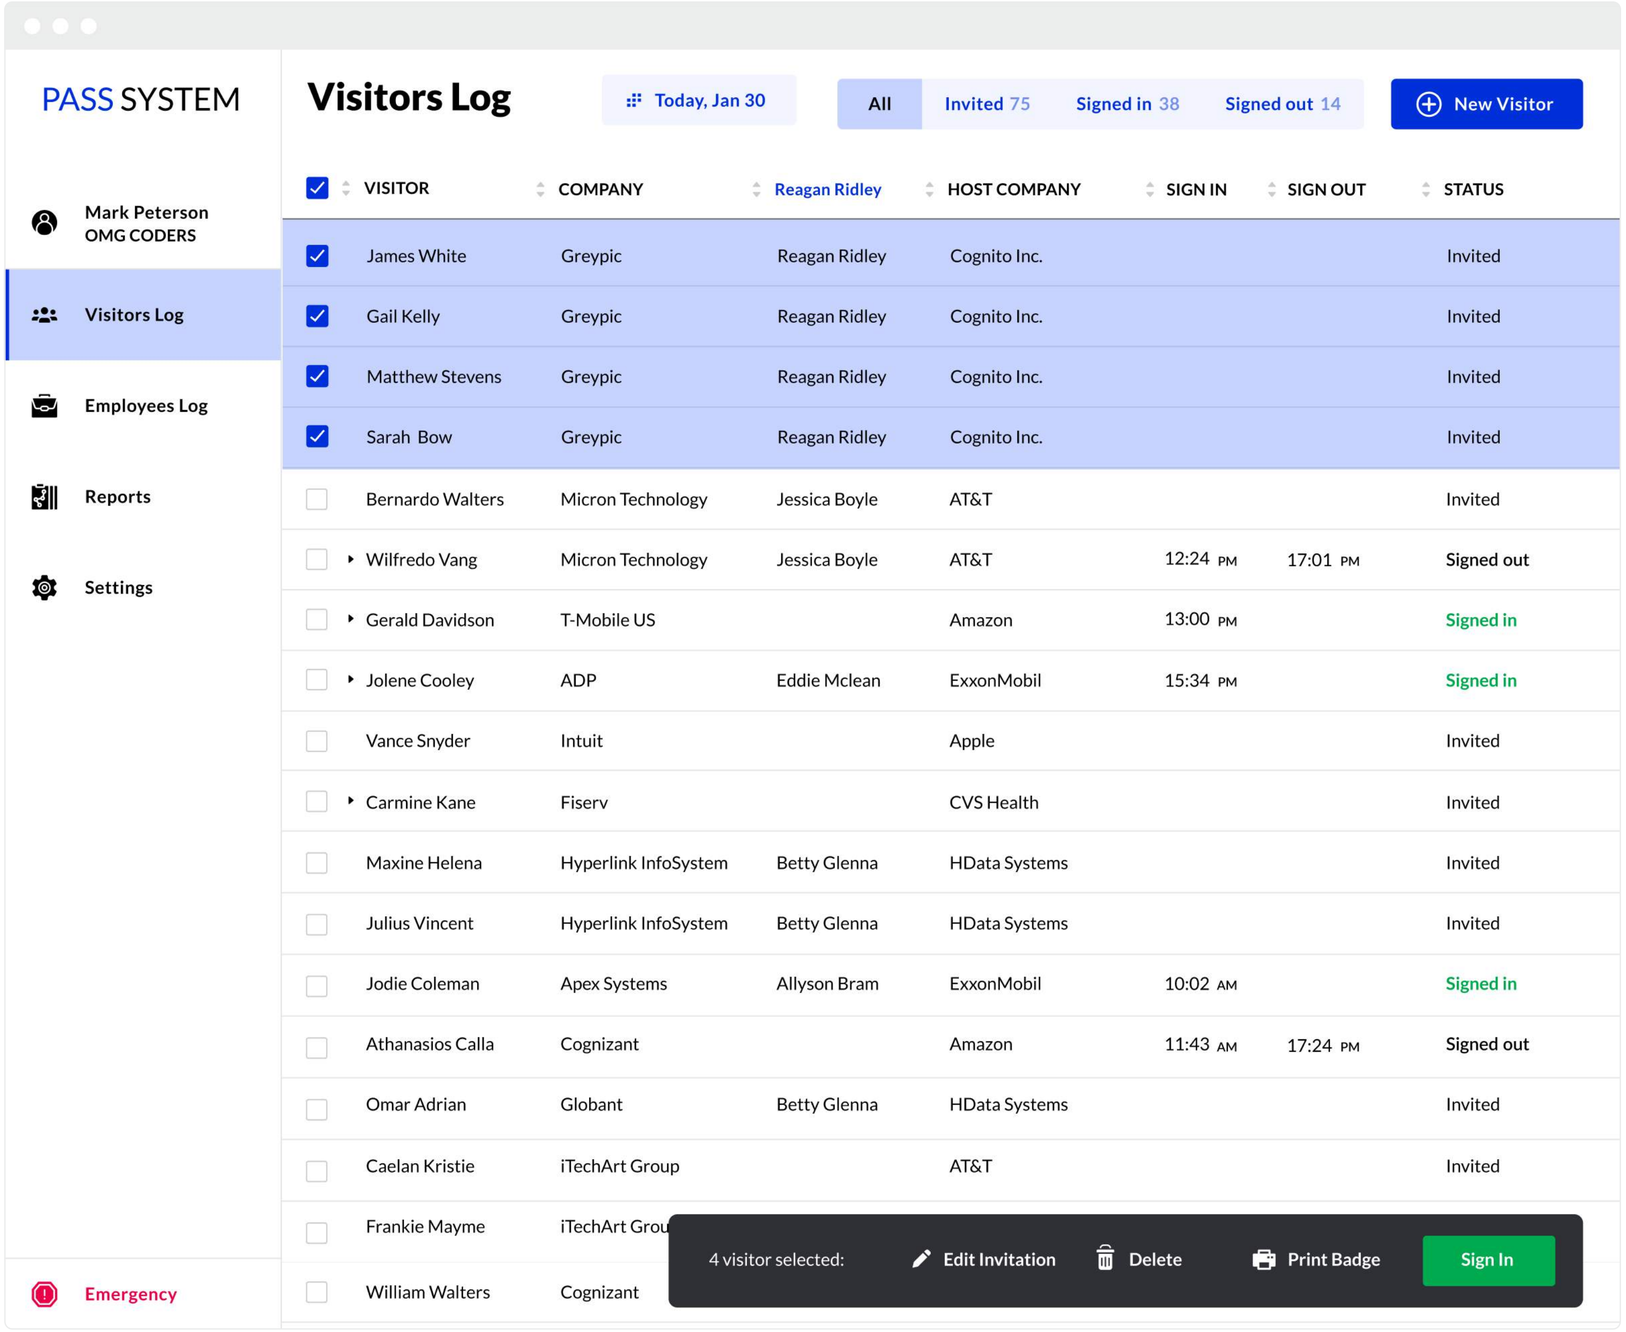


NDA

Access control system

Business centers and offices prioritize security, which is why it's essential for them to know who, when, and for what purpose enters the building.

We've designed the interface for the access pass issuance system and the terminal interface that greets visitors.

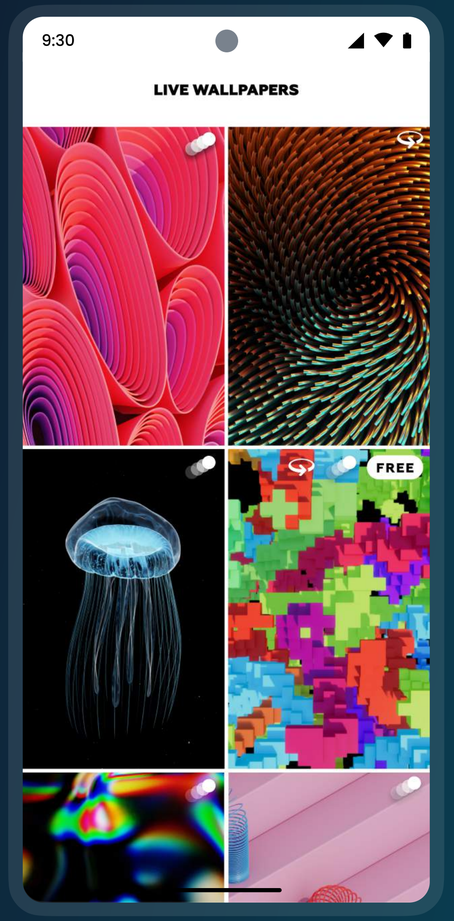


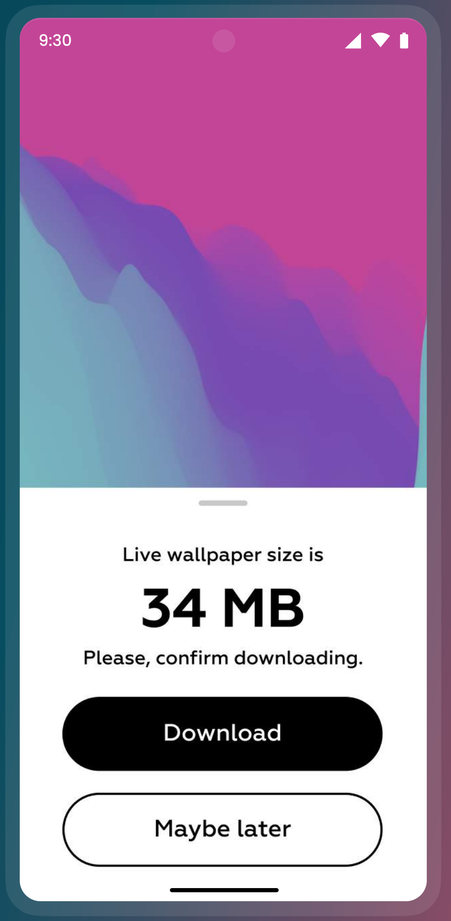
Preparing for publication

Live wallpapers Ornamental

Ornamental is our project with animated wallpapers for Android phones.

We conceived and developed the application. We are continually growing the project and adding new live wallpapers.



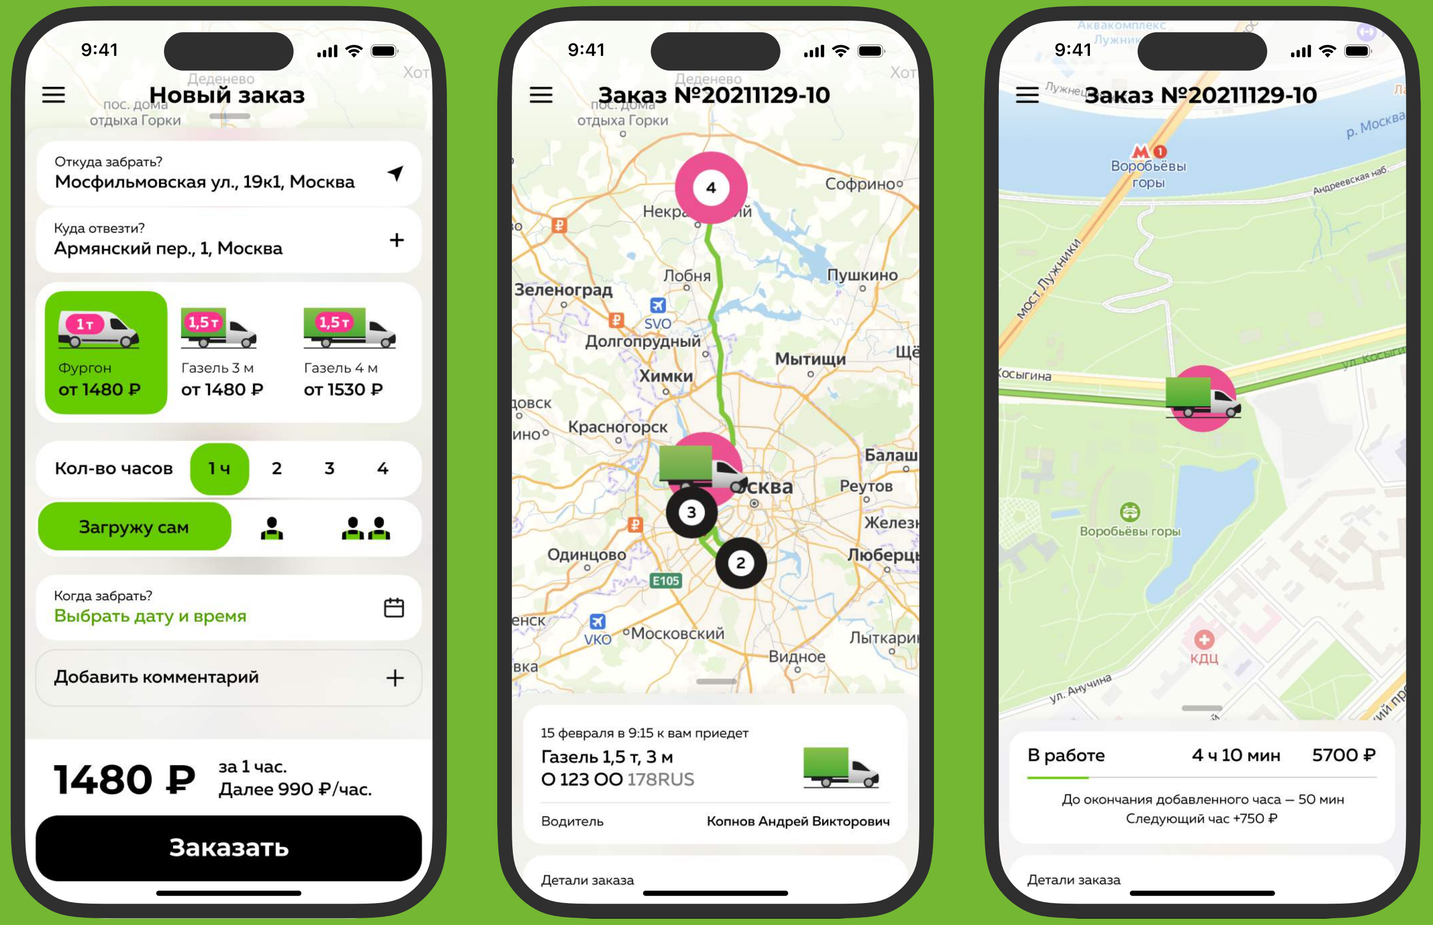


Ornamental.app

The Podorozhnik app for ordering transportation

The Podorozhnik transportation company assists with relocations, transports cargo, and delivers products from online stores. Customers can order cargo taxis through the app just as easily as regular taxis.

We designed the branding and the app for both iPhone and Android.

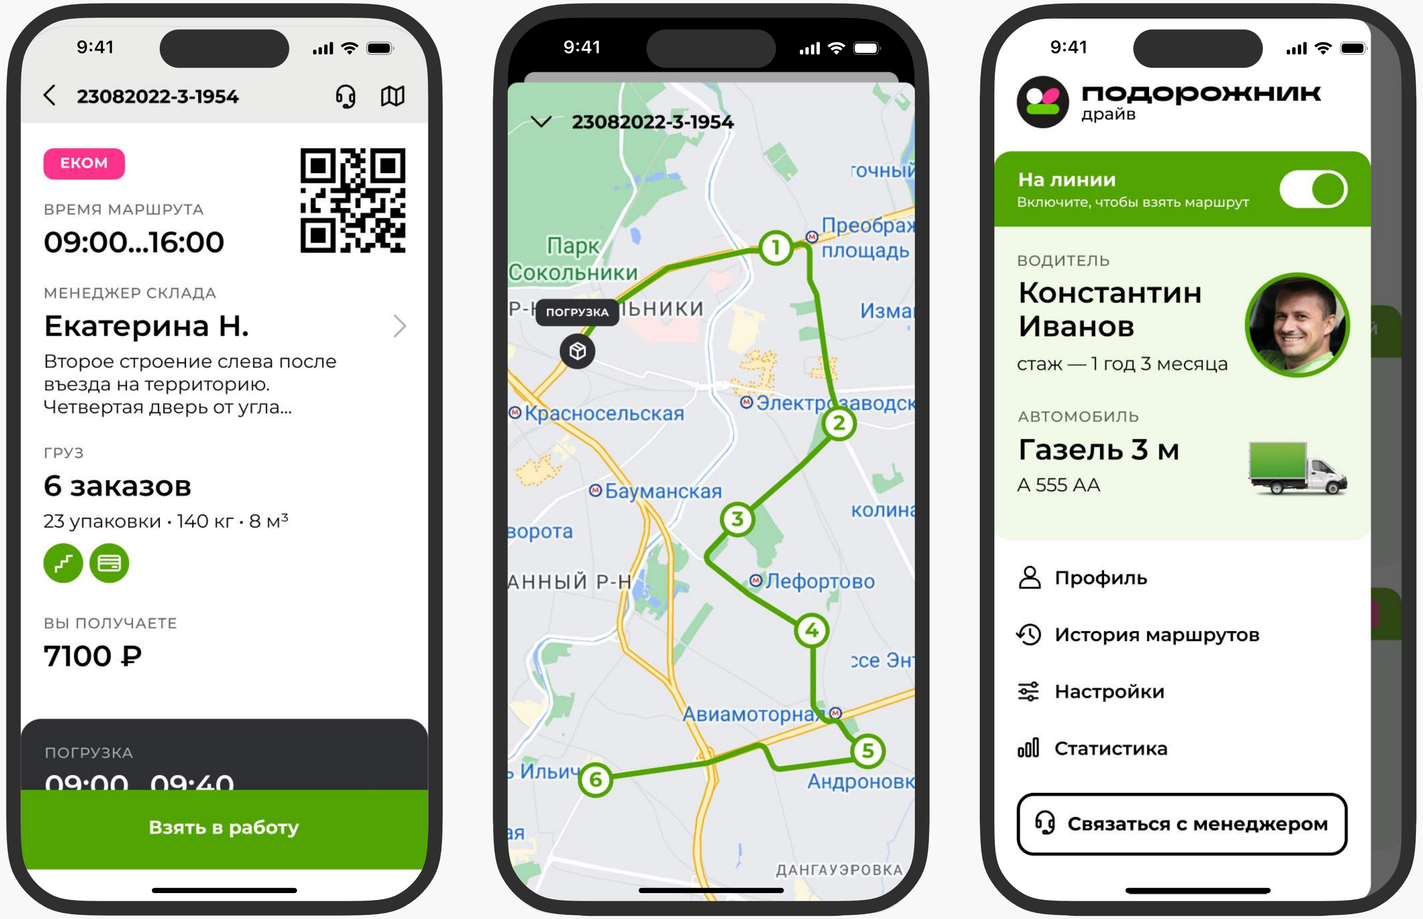


Preparing for publication

The Podorozhnik driver app

Podorozhnik drivers take orders, communicate with customers, and deliver cargo through complex routes.

We designed an application that makes it convenient for drivers to work.



Preparing for publication

The Bubulearn app for speech therapy sessions

At Bubulearn, it's easy for speech therapists to provide exercises during the lesson, and students find them engaging.

We designed the app and came up with a mascot that demonstrates the exercises.

Text Visual Alignment
By Devexperts
16
Try it out 408
When working with typography in Figma you often have to manually move text layers and align them to the grid or ruler. This happens because of glyph sidebearings which create huge “white holes”. It gets even worse if you have two text layers of different sizes. In this case the “holes” become much more visible.

WESO* — российский бренд выхлопных систем премиум-класса

* Аналог Bosal

WESO

О нас Контакты

Преимущества работы с продукцией WESO:

1

Ассортимент более 300 артикулов

2

Склад в России, продажа за рубли

3

Диаметры хомутов от 38 мм до 58 мм

4

Соответствие всех компонентов спецификациям оригинального оборудования

5

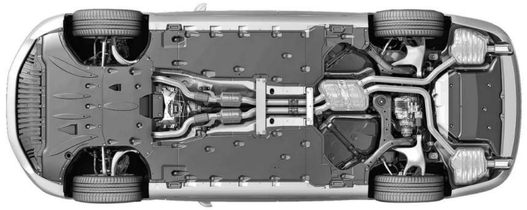
Совместимость с выхлопными системами разных производителей

6

Все необходимые типы метизов: болты, шпильки, гайки, шайбы

7

Большой выбор разнообразных типов элементов



WESO

О нас Контакты

Новый бренд — заслуженная история

WESO

О нас Контакты

Компания ACPS Automotive в течение многих лет была частью международной компании BOSAL — известного производителя выхлопных систем и имеет огромный опыт продаж такой продукции.

Мы хорошо знаем мировой рынок выхлопных систем и знакомы со многими производителями как собственно глушителей, так и различных комплектующих и частей, без которых правильная установка выхлопной системы на автомобиль невозможна.

Таблица соответствия артикулов WESO и изделий других марок

В связи с возникшими в 2022 году сложностями с поставками мы приняли решение, используя весь наш многолетний опыт, экспертизу, налаженные связи и имеющуюся инфраструктуру, создать собственную линейку премиальных выхлопных систем, для которой отобрать самых ответственных поставщиков наиболее качественной продукции.

9:41

WESO О нас Контакты

Гарантированное качество и стабильное снабжение

Мы гарантируем качество в условиях, когда сложившиеся цепочки поставок нарушены или поставки сильно затруднены, на рынке стало много изделий, являющихся упрощенными и удешевленными копиями оригинальных изделий.

Эти изделия будут поставляться под брендом WESO и без наценки, которую известные компании закладывают в свою продукцию за бренд.
